

Transform hospital operations with ISH+

Streamline your process to enhance care and ensure compliance.

Poor systems undermines your hospital's potential.

- **Operational silos:** Disconnected systems disrupt care coordination and increase error rates.
- **Compliance risks:** Meeting HIMMS, HIPAA, JCI, OHCS and POPI standards is resource-intensive.
- **Rising costs:** Balancing care quality with financial pressures puts strain on budgets.
- **Poor insights:** A lack of actionable data leave teams ill-equipped to make decisions.

ISH+: Unified care, unmatched efficiency.

- **All-in-one platform:** Combines ERP, EHR, EMR, and RCM into a single system, giving you the truth.
- **Promotes collaboration:** Allows all stakeholders to interact on one, unified platform.
- **Cost-effective:** Automates processes, reduces errors, and eliminates revenue leakage.
- **Interoperable:** Integrates with SAP, Oracle, Xero, Sage, and more industry standard systems.

Why ISH+ stands out.

- **Packed with configurable content:** Pre-delivered with industry-standard content.
- **Configurable design:** Adapts to your workflows without custom coding.
- **Top-tier security:** MFA, audit trails, and compliance with global privacy laws.
- **Patient-centric:** Empowers patients to share data securely with any provider.

Key Highlights

Enhanced efficiency: Centralizes data and streamlines workflows across departments.

Improved outcomes: Unified patient records elevate care coordination and satisfaction.

Financial health: Optimizes billing, maximizes resource use and provides real-time financial oversight.
