

Power up your risk defence with Impi

Enhance patient safety while ensuring compliance and reducing risk.

Risk management teams face mounting pressures.

- **Inefficient incident tracking:** Paper-based systems delay reporting and resolution, increasing risks.
- **Regulatory compliance:** Adhering to healthcare standards (OHCSA, POPIA) is critical yet complex.
- **Legal exposure:** Inadequate documentation leaves hospitals defenceless against medico-legal cases.

Impi: Precision, protection, performance.

- **Rapid incident capture:** Step-by-step reporting ensure quick, accurate and complete documentation.
- **Intelligent grading & routing:** Prioritizes incidents by type, severity, and risk for efficient resolution.
- **Forensic audit trail:** Comprehensive records of all actions safeguard against legal challenges.
- **Built-in:** Aligns with privacy and healthcare regulations seamlessly.

Impi helps achieve your KPI's.

- **Address under-reporting:** Simplified reporting increases documented incidents for better oversight.
- **Time to resolution:** Automated workflows and smart routing cut resolution times significantly.
- **Patient safety scores:** Proactive incident management and root cause analysis improve safety outcomes, and helps you comply with OHS (office of healthcare standards).

Why Impi stands out.

- **Easy to use:** Improves adoption amongst nurses.
- **Rapid deployment:** Configurable in hours, not weeks.
- **Seamless integration:** Connects to any HMIS via Rest API.
